Non-Metallic RAINBOX™

Made in USA

NEW!

Raintight Box for Exterior Fan/Fixture Installations

Arlington's non-metallic **RAINBOX™** is the raintight, labor-saving solution to installing a fan or fixture exposed to the elements, inside or outside. This box eliminates the need for time-consuming field modifications. It's completely sealed so water stays out and wiring stays dry. Plus, it supports a 70 lb fan or fixture securely and safely.

RAINBOX is perfect for any area with open exposure to wind-driven rain and water spray; anywhere you would install a wet- or damp-rated fan. Uses include pool screen enclosures, open porches, lanais, outdoor kitchens and eating areas, pavilions, greenhouses, barns and more.

- Oversized medallion accommodates canopies up to 7" in diameter
- Two colors: white and bronze
- UL/CSA Listed, raintight assembly
- NEC code-compliant. Completely sealed against water, dirt and pests – no exposed wiring

White RAINBOX™
(exploded, with components)

Easy, **Raintight Installation** in **Wet or Damp Areas**...

Install fitting with conduit. Seal unused openings with supplied plugs. Mount box to structural member.

Pull wire (not included).

Attach medallion to box with supplied #8 x 1-1/4" screws.

Attach fan/fixture bracket to structural member using supplied long screws (#12 x 4"). Connect wires and install fan/fixture per manufacturer's instructions.
