Re: Phase out of the 9367-E/EW and phase in of the P-9367/OW

P-9367OW Shown

Effective immediately, Allied Moulded will begin a rolling change of the 9367-E and EW fiberglass side cube box. They will be replaced by thermoplastic versions.

The P-9367 will have mounting ears and the P-9367OW will have both ears and wing brackets.

The P-9367 Series are 16 cubic inches and UL listed.

Current orders for the 9367-E and 9367-EW will be filled with the remaining fiberglass stock. Once that is depleted, we will begin shipping the P-9367 in lieu of the 9367-E, and the P-9367OW in lieu of the 9367-EW.

Please mark the 9367-E and 9367-EW as discontinued on any price sheets and add the P-9367 and 9367OW. Standard pricing and packaging of 50 pcs per carton will remain unchanged between the thermoplastic and fiberglass products. The P-9367 (UPC 98707) and P-9367OW (UPC 98708) can be ordered immediately.

Product details and technical information are available at www.alliedmoulded.com. Please share this information with distribution partners and endusers.

Thank you,

Ron Robinson | National Sales Manager – Residential Products
