

Appleton™ and O-Z/Gedney™ Liquidtight Connectors

An Extensive Range of Quality-Engineered Connectors for Wet and Corrosive Environments

Appleton and O-Z/Gedney by Emerson offer a complete range of liquidtight and vibration-proof connectors that are ideal for wet, challenging locations and suitable for use in Class I, Division 2 and other hazardous locations. With multiple sizes and options, they're ideally suited for OEM applications, including petroleum machinery, machine shop equipment, conveyors, packaging and more. Appleton and O-Z/Gedney liquidtight connectors by Emerson assemble quickly and easily offering superior protection, quality and versatility for the long haul.

Appleton and O-Z/Gedney are the cornerstone brands of Emerson's Electrical Apparatus and Lighting business; trusted worldwide to make electrical installations safer, more productive and more reliable.

Designed to stand up to the most demanding wet and corrosive environments, liquidtight connectors are suitable for a wide range of commercial and industrial installations.

Tested Solutions to Solve Your Toughest Challenges

Our Appleton and O-Z/Gedney Liquidtight Connectors are tested to perform in environments beyond your worst expectations relative to corrosive atmospheres, extreme temperatures, heavy vibration and electrical disturbances.

Corrosion

Materials and finishes offer superior corrosion resistance

Ingress Protection

Seals out oils, liquids, dust, dirt and fumes

Marine

NEMA 4, 4X, and 12 rated options

Waste Reduction

Reusable ferrule options are easy to install and re-install

Vibration

Rigorously tested against vibration to ensure a strong connection

Easy Installation

Features fewer parts for quicker, easier installations

Strife Test

Long service life

Safe Grounding

External grounding lugs provide electrical connection

Added Protection

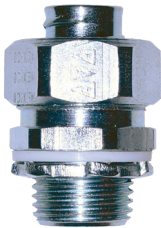

Available with wire mesh grips for additional strain relief and over-bend protection
