LED PANEL DOORFRAME RETROFIT KIT

DESCRIPTION

2x4 LED Retrofit Panel Kit feat. Power Select & Color Select with Embedded Smartloop PIR Sensor

10 YEAR
LIMITED WARRANTY

PRODUCT FEATURES

- Used to Upgrade existing 1x4, 2x2, and 2x4' fluorescent recessed troffers, without modifying existing fixture mounting.
- Keystone Power Select technology. (see Performance Specifications for details)
- Keystone Color Select Technology: Adjustable CCT (3500K, 4000K, or 5000K)
- Construction features precise optical lenses over each individual LED, offering optimal light diffusion and consistent surface illumination, with no risk of yellowing over product lifetime
- Powered by Keystone 0-10V Dimming LED Driver
- Compatible with Keystone SmartSafe LED Emergency Drivers
- Suitable for damp locations
- Nearly 70% energy saving savings compared to traditional fluorescent troffers without controls
- Operating temp range -20°C/-4°F to 40°C/104°F
- Features integrated Keystone SmartLoop Bluetooth™ mesh wireless sensor controller.
- The sensor controller may be used "out of the box" as a stand alone sensor (pre-commissioned, see page 2 for details); or may be commissioned using the SmartLoop app to add advanced functions such as zoning, high end trim, configure occupancy/vacancy behavior, create scenes, and set schedules.
- LED chip lifetime: L70 >100,000 hours @ 25°C/77°F ambient fixture temperature
- To learn more about the Keystone SmartLoop System, visit <http://www.keystonetech.com/smartloop>

LED PANEL DOORFRAME RETROFIT KIT

INSTALLATION INSTRUCTIONS

Always turn off the power supply from main circuit breaker first!

1. Dismantle accessories from the original housing (ballast, fluorescent tube, sockets, bracket and other accessories that may interfere the installation). Note: The original housing must be retained in place. Reserve the L&N wire of original housing to connect retrofit kit in later step. Plug previous holes from ballast with appropriate screws and nuts.

2. Insert the two brackets into the clearance between the housing and T-grid.

3. Insert the two side bars into the clearance between the brackets and the T-grid.

4. Using the included self-tapping screws, use electronic screwdriver to secure brackets into place through bracket mounting holes from inside of the fixture. Caution: Luminaire wiring and electrical parts may be damaged when drilling for installation of LED retrofit kit. Ensure that enclosed wiring and components have not been damaged.

LED PANEL DOORFRAME RETROFIT KIT

5. Embed the rotary screws on the edge of the panel into the bracket chutes. Push to the end in the direction of chutes to secure panel.

6. Connect L&N wire from original housing to the driver of the retrofit using appropriate connectors. If using 0-10V dimmer, connect DIM+,DIM- to 0-10V dimmer wires. Connect the green ground wire of the retrofit kit to the fixture with a wiring cap to ensure grounding safety.

7. Attach clips from the retrofit kit to the brackets.

8. Close the retrofit kit door into the fixture and rotate the clips to secure the door closed.
