

New Reiker® Shallow Box Improvements

November 12, 2003

Pass & Seymour is proud to announce another in a long line of product improvements to Reiker Ceiling Fan and Fixture Supports. All **shallow boxes** have been redesigned to add our popular **rotating dual supports**, that simplify installation and increase installer productivity.

FEATURES & BENEFITS

- Unique rotating dual supports allow easy installation of ceiling fans or light fixtures.
 - Replace single #10 threaded stud supports on all shallow boxes.
 - Supports have two sets of holes marked “10/32” & “Fan” and “8/32” & “Fixture”.
 - Holes are drilled and tapped through the entire length.
- All models include peel-off tape to free up hands for tools.
- All models include pre-installed ground screws to save time and avoid loss.

APPLICATIONS

- Direct mount under joists for 1/2" or 5/8" drywall ceilings (77705 & 77700).
- Direct mount repositioned under joists for thicker or firewall ceilings (77706).
- Between joists for alternate fan or fixture location (77702).
- Available bulk packs simplify ordering and reduce jobsite waste:
 - Catalog #67705 (50 bulk contractor pack of 77705)
 - Catalog #77708 (50 bulk contractor pack of 77702)

ORDERING INFORMATION

Catalog Number	Description	Weight Rating	Volume Cu. In.	Box Depth	Packaging Quantity
