T8 Freezer / Cooler Led Tube V Shape

TKZS-T8 Series

DESCRIPTION

The T8 5ft / 6ft LED freezer/cooler clear tube of 36W / 40W comes in V shape with 6000K color temperature and a CRI of more than 80, providing us with excellent energy savings, neutral white, day white light color glow, and a more than standard Color Rendering Index.

APPLICATIONS

These lights are Certified to be safe around foods and drinks and have the proper protection to prevent any moisture from damaging the lights. These lights will replace the existing fixture and come with an Internal Driver

TKZS-T8-40P 6FT—INT COOLER	PC cover	40W	120Lm/w	6K

Specification Features

Features

The heat sink made of aluminum allows for excellent dissipation of heat. And, that is why, our cooler tubes never fail until and unless they have reached the end of their lifespan .

Warranty

5 Years Limited Warranty. See warranty documentation for more information.

Certification

It complies with ETL and 5 years warranty

Installation / Mounting

The installation of an LED cooler tube comes easy with few screws to mount the cooler tube fixture on any surface of the cooler and then making few wire connections.
